

# PROGRAM for ASPIRING WOMEN SCIENTISTS

*Have you ever felt that you are in a group where others are more deserving than you? That you may not be able to live up to expectations of others? Well, you are not alone...*

*Join us to find out more about **the imposter syndrome, unconscious biases, and how to combat the same.** We will be discussing gendered experiences of women in science, dealing with microaggressions, decision making, and career opportunities.*

## PAWS workshop at IISER Mohali

Lecture Hall 1, 19<sup>th</sup> April at 5 pm, Duration: 2 hours

Deepa Chari  
Homi Bhabha Centre for Science  
Education, TIFR  
**Convener**

Tripta Bhatia  
Department of Physics, Indian  
Institute of Science Education and  
Research Mohali  
**Local Convener**

The PAWS workshop is an interactive workshop for women undergraduate, postgraduate, PhD students, particularly designed keeping the physics discipline in mind. These activities introduce participants to the notions of "implicit bias" and "feeling of imposter" and support them to think about ways of combating it using peer support.
